PLUTO technical specifications

Pluto

Monitor Arm

The Pluto range of Monitor arms is the ideal ergonomic and space saving desk mount for any home or office project. It's simple yet elegant design and powder coated finish adds style and functionality to any workspace.

Designed to accommodate larger, heavier screens, each Pluto arm carries a weight rating of 10kg. Strong enough for screens, laptops, and all-in-one computers. The broad range of movement for the single and dual arm pivot points combined with their adjustable height helps create a workspace that can be customised for any user in any position.

The screen can be extended 442mm for the ideal user focal length and rotated a full 180° around the pole. The optimum viewing angle can also be achieved with an 80° tilt and a pan of 180°.

Available in White, Black or Silver finish, the Pluto comes with built in cable management clips to help keep the work space neat and tidy.

Comes with a comprehensive 7 year guarantee.
