ELEVAR TITAN
technical specifications

ELEVAR TITAN
Workstation

Engineered for demanding environments, the TITAN Workstation is built to deliver exceptional strength, flexibility, and long-term reliability. Designed around our heavy-duty TITAN platform, it provides a lifting capacity of up to 450kg, making it ideal for mission-critical spaces where multiple monitors, specialist equipment, and continuous operation are essential.

Its modular frame design allows for a wide range of configurations, including U-shaped, curved, and extra-long right-angle layouts, making it easy to accommodate unique room designs and operator requirements. The robust steel construction ensures outstanding stability, while the adjustable frame system allows for customised workstation dimensions without compromising performance.

Whether specifying a single operator station or a large multi-user control room, the TITAN Control Room Workstation delivers the durability, adaptability, and ergonomic performance required for 24/7 operational environments.

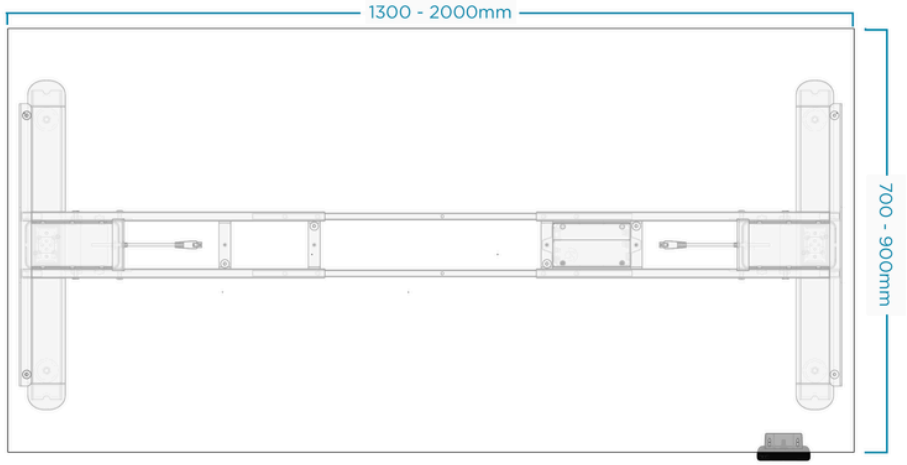

Product Type	Heavy Lift electric workstation - 1 motor per leg
Certifications	AS/NZS 4442 standards compliant
Weight Capacity	TITAN20 - 200kg
	TITAN30 - 300kg
	TITAN45 - 450kg
	TITANC Series - 100kg per leg
Height Range	TITAN20/30/C Series - 635mm - 1297mm ex. top (3-stage)
	TITAN45 - 700 - 1180mm ex. top (2-stage)
Operational Speed	20mm/sec at maximum weight load
	Operating volume less than 40dB
Configuration	2-leg desk
	3-leg workstation
	4-leg heavy duty desk
	Multi-leg custom workstations, up to 12x legs operating on one controller
Frame Finish	Pearl White (*W), Jet Black (‘B)
Warranty	TITAN - 10 years parts replacement all components
	TITANC - 3 years parts replacement (based on 24/7 use)
Controller Features	Lockable LED controller
	3 favourite settings
	Programmable min/max height range
	Collision and tilt avoidance sensors
	Safety lock
	USB-C fast charging port
