XLOCK180 Bluetooth + RFID Mifare

- XLOCK 180 is mounted vertically and features a triangular bolt mechanism.
- It is invisibly mounted behind the door for a clean aesthetic
- It is administered via the XLOCK Phone App and controlled via Bluetooth Low Energy (BLE)
- Can be used for allocated lockers (allocated via Phone App).
- Booki iT - user booking mode available via Phone App in conjunction with WiFi Gateway connection.
- Best used where a combination of Phone and Card access is desired.
- Also best option if access to some data audit log is required.
