About OLP

Proudly Australian-owned since 2009, OLP is a leading wholesaler of commercial furniture and storage solutions across Australia and New Zealand. With national warehousing, fast delivery on stocked products, and the ability to customise new designs, we deliver style, function, and sustainability without compromise. Our national business development and customer service teams ensure every project receives expert, personalised support, from concept to completion.

About Steelco

Steelco has been delivering high-quality, sustainable storage solutions for over three decades. With accredited products built for quality, durability, and environmental responsibility, and a strength in customisation, we bring the latest designs to the Australian and New Zealand markets, crafted to meet the needs of every space.

Certifications and Sustainability Features

FSC® (Forest Stewardship Council)

This product uses timber that has been certified by FSC. They promote environmentally appropriate, socially beneficial, and economically viable forest management. FSC certification assures customers that the wood used in our products is sourced from responsibly managed forests that meet the highest global environmental and social standards.

Manufactured for Disassembly

This product has been designed for disassembly which allows it to be easily taken apart at end-of-life for reuse, repair, or recycling. This innovative design philosophy not only prolongs product usability but also simplifies waste diversion, lowers environmental impact, and reflects modern principles of circular design.

VOC-Free Materials

Volatile Organic Compounds (VOCs) in this product is below the emission rate limit set by the Green Building Council of Australia. VOC-free products improve indoor air quality, supporting healthier work environments.

100% Recyclable Steel

This product uses steel that is 100% recyclable at the end of its lifespan. Every steel component can be processed through recycling systems to be reused. This reduces landfill waste and supports clients in meeting green building and environmental certification targets.

Made from up to 20% Recycled Steel

This product is manufactured using steel that contains up to 20% recycled content. This reduces demand for virgin materials, lowers carbon emissions associated with steel production, and supports the circular economy, all without sacrificing structural integrity or product performance.

Australian Trusted Trader

OLP is an accredited Australian Trusted Trader, recognised by the Australian Government for our secure and compliant international trade operations. This accreditation signifies our commitment to ethical sourcing, customs compliance, and risk management allowing us to build stronger partnerships and deliver more efficient, transparent supply chains.

APCO

OLP is a member of the Australian Packaging Covenant Organisation. OLP is committed to reducing the environmental impact of our packaging. We use packaging that prioritises recyclability, and avoids excess plastic and other materials.

Sedex

OLP is a registered supplier in the Sedex Ethical Sourcing Platform. OLP is committed to improving ethical, social and environmental standards at every step of our supply chain. **Reference No. ZC1011847**

ISO 9001:2015 – Quality Management System

OLP has a Quality Management System (QMS) that focuses on continuous improvement in customer service to our clients, including the delivery of quality products and services that are manufactured and provided to the highest industry standards. By following our QMS we are able to control the quality of all products that we distribute regardless if they are custom one-offs or our standard range.

ISO 14001:2015 – Environmental Management System

OLP's Environmental Management System (EMS) gives us the ability to identify better allocations of our "resource, waste and energy management" minimising our environmental footprint. The focus on providing an eco-friendly environment has significantly reduced our environmental impact and subsequently our entire networks impact, with the hope that it continues to reduce going forward into the future.

ISO 45001:2018 – Occupational Health & Safety

OLP has adopted international best practices in our systematic approach to health and safety management, by focusing on a proactive approach rather than reactive controls. From this structure it is easy to see that OLP has a rigorous OHS policy and management system in place to protect the health and safety of our employees and visitors at all OLP facilities and sites.

Product Stewardship

OLP embraces product stewardship by taking responsibility for the entire lifecycle of our products, from design and manufacturing to use and end-of-life. We implement take-back schemes, offer recycling support, and partner with industry programmes to ensure products are disposed of sustainably. This commitment reduces landfill waste and promotes responsible resource use.

Flush Front Locker

Flush Door Steel Lockers feature a design that includes a flush door closing mechanism. These lockers have been designed to fit into any modern commercial space, with a wide range of customisation options to make the units unique.

Ngubitj (Water)

Ngubitj is the traditional name for ‘Water’ on Wadawurrung country the artwork here shows all the river and creek systems intertwining across Country, water is the life blood of country when our waterways are flowing our Country is thriving, the circles represent places of gathering close to these rivers, creeks and waterholes on Country, when aboriginal people gather they always gathered in circles to always have eyes on the knowledge holder/elders speaking, the many resources available provided a sustainable living landscape for Wadawurrung people for thousands of generations.

About the artist

This design was created by Geelong based Wadawurrung Man and artist Billy-Jay O’Toole.

You can learn more of Billy-Jay's story on our website, or you can see more of his art below

Lock Systems

There are a wide variety of lock options to choose from, with varying features and locker compatibility. To discuss which locks would best suit your needs and your locker of preference, contact your local sales representative.

Standard Lock Options

Pad-latch

Pad-latches offer flexible security by allowing users to apply their own padlocks. This is a cost-effective and user-controlled option for shared spaces.

Keylock

The Keylock is a simple, reliable key-based locking mechanism. It's easy to use and integrates seamlessly into standard locker designs, offering basic security for personal or workplace storage.

Additional Lock Options

Mechanical Combination Lock

They offer keyless entry with programmable codes. Ideal for shared or high-use areas where durability and convenience are essential.

Push Button Digital Lock

They use mechanical or electronic buttons for quick PIN entry, requiring no batteries or power. Great for fast, reliable access.

Touch Pad Digital Lock

They feature a sleek, illuminated keypad for PIN entry, blending modern design with secure, user-friendly operation.

RFID Lock

They provide contactless access via swipe cards and integrates with access control systems for efficient, centralised security.

Padlock

A budget-friendly, versatile solution for lockers with padlatch fittings. Users keep their own combinations, making them well-suited for temporary or casual use.

Coin Operated Lock

They are perfect for public spaces like gyms, offering short-term use with either refundable or paid coin access.

Steelco Smart Solutions

Steelco Smart Locker Systems deliver secure, adaptable storage with advanced electronic locking technology. Designed to streamline storage management, these lockers offer flexible access options, real-time usage tracking, and seamless integration with your workplace or public environment. Ideal for parcel management, personal storage, and shared asset control, Steelco Smart Lockers deliver efficiency without compromising on durability or style.

The Steelco Smart software suite connects every locker, user, and transaction through one intelligent system. From the Mobile App and Web App for users, to the Portal and Smarty Terminal for operators, our software ensures smooth operation, flexible access, and complete visibility across your locker network — anytime, anywhere.

Functions and possibilities

- Unified platform linking lockers, users, and analytics
- Real-time access, status, and reporting tools
- Multiple user interfaces
- Role-based permissions and open API integration
- Secure, scalable, and cloud-managed for global control

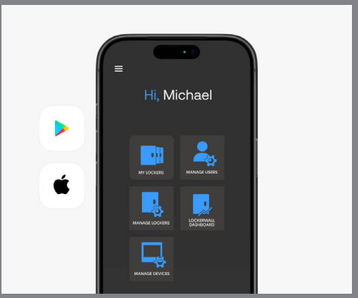

René Smart Lock

The powerhouse of the Steelco Smart ecosystem, René is a profile-mounted electronic lock built for precision, reliability, and flexibility. Designed as a fully modular Plug & Play system, it supports both electrical and mechanical overrides — ensuring operation continuity even during power outages.

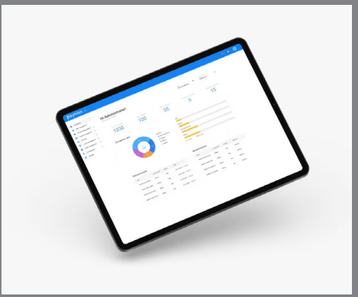

René enables smooth Push2Open and Pop2Open functionality, allowing businesses to adapt the user experience to their access flow.

For more information about Smart Locks, please contact your local sales representative.

Admin Portal

Accessories

We offer a full range of locker accessories to optimise the use of your locker storage and requirements to ensure all your belongings are kept neat and safe while not in use. To discuss which accessories would best suit your needs and your locker of preference, contact your local sales representative.

Numbering

Steel Lockers can be equiped with numbers to help users easily identify their locker. We offer a range of options including steel and vinyl.

Additional, Fixed or Retro Fit Shelf

Fixed or Retro Fit Shelves are available to add additional shelving within the locker after it has been installed. Requirement of additional shelves may need to be

Sloping Top

Sloping Tops are perfect to prevent the buildup or dust and dirt.

Planter Boxes

Planter Boxes offer a the opportunity to integrate plant-life into your space.

Hanging Rail

Hanging rails are available to install inside the locker compartment for hanging storage. They provide a practical solution for keeping uniforms, jackets, or bags neat and wrinkle-free.

Coat Hook

Coat Hooks are handy to hang clothes or other items.

GPO and USB

GPO and USB capabilities can be installed to allow users to charge their devices while using the locker. This modern feature supports users' tech needs in schools, gyms, or workplaces.

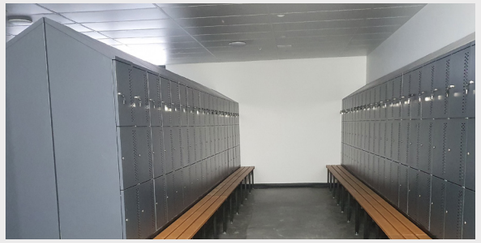

Smart Locker Screens and Cable Management

Smart locker screens enable digital access control, usage tracking, and locker allocation, ideal for modern offices or shared facilities. Integrated cable management keeps power cords tidy and secure, maintaining a clean and functional tech-friendly space.

Island Bench

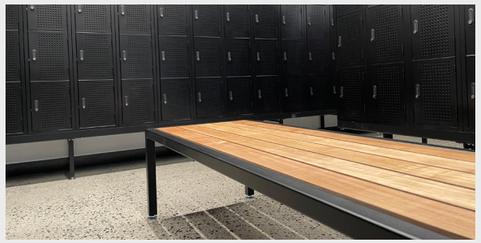

Specifically designed to coordinate with Lockers, Seats, and Stands, the Island Bench gives the user additional off floor storage as well as a practical and robust seating option.

Steelco Locker

Accessories

Locker Tray

Locker Trays help users gain an additional level of organisation in their locker.

Locker Tote

The Locker Tote is a sturdy mobile carrier for light office equipment. It is softlined and is ideal for hot desking application. Made with 100% recycled materials and fully recyclable, our locker tote is perfect for sustainability minded people.

Corner Infill

Corner infills close off gaps between locker runs and adjacent walls or fixtures for a clean, seamless finish. They improve hygiene by preventing dust buildup in hard-to-reach spaces and enhance the overall visual integration of locker installations.

Mail Slot

Mail slots allow secure delivery of documents or small parcels directly into individual lockers without requiring key access. They're perfect for shared office setups or parcel management systems in residential or commercial buildings.

Adjustable Feet

Adjustable Feet offers compensation for uneven floors, ensuring stable positioning.

Plinths

Plinths elevate the locker off the ground for easier access to lower doors.

Plinth Cable Draw

The plinth cable draw conceals and routes power cabling beneath lockers, maintaining a clutter-free floor space. It ensures safety and aesthetics by managing electrical infrastructure without compromising locker accessibility or layout.

Locker Seat and Stand

The Locker Seat and Stand is the perfect solution to give your locker units more functionality.

Locker Stand

The Locker Stand elevates the locker off the ground for easy access and cleaning underneath. It helps keep items safer from wet floors and flooding.

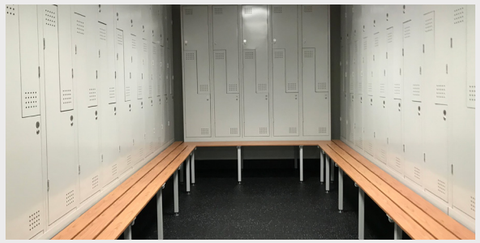

Not all accessories are suitable for each product. Images are for illustration purposes only, subject to change. For more details on the available accessories, please contact your local sales representative.

Steelco Locker

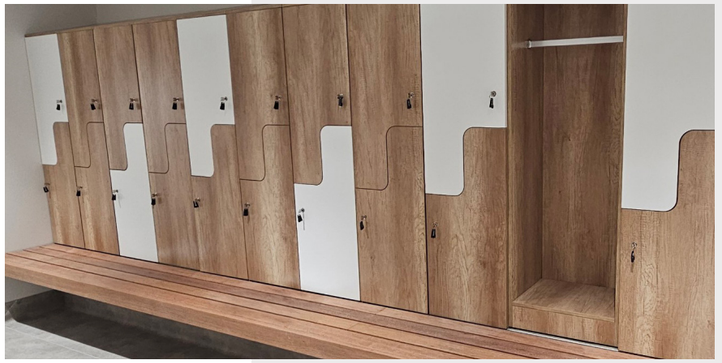

Custom Projects

We focus on delivering products to our customers that meet their specific requirements. Due to our flexibility of our manufacturing plants, if you're looking for a custom size, colour, perforation or combination of materials, chances are we can do it!

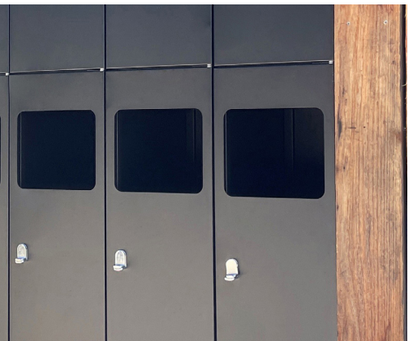

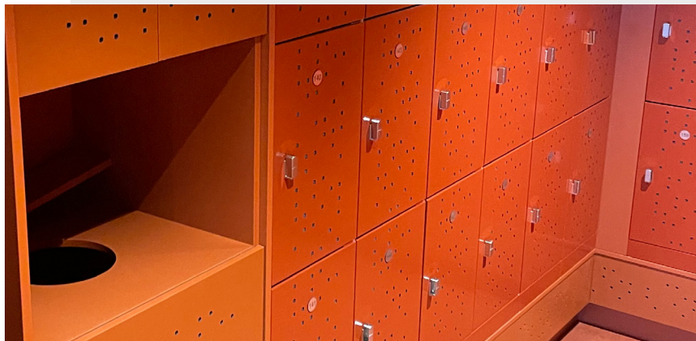

Steelco Locker | olp

Customer satisfaction is an imperative component of the comprehensive service that OLP provides. We strives to meet objectives and deliver products and services to meet our customer's needs.

OLP also endeavours to provide a better product and ongoing service, to do this we follow our ISO 9001:2015 certified quality management system.

Business Development Managers

We are represented in every state of Australia and New Zealand. If you wish to get in touch with us, please contact your local sales representative.
