Moon and Crossa Bases

The Moon and Congo table base series offer a versatile and robust foundation for any commercial dining or bar setting. The Moon base features a sleek, circular disc design that provides a clean, modern aesthetic, while the Congo base utilises a classic four-star cross profile for a more traditional architectural look. Both ranges are available in standard dining heights and elevated drybar versions, ensuring a cohesive design language throughout a venue's various seating zones. Crafted from high-quality galvanised cast iron and finished in a durable powder coat, these bases are engineered to support heavy table tops while resisting the elements in both indoor and outdoor environments.
