Macau

The Macau Gaming Range is defined by its low-profile, high-impact design, specifically engineered for venues that prioritise clear sightlines across the gaming floor. Unlike the taller backrests of the Trump or Luxor models, the Macau features a sophisticated, mid-height "pill" backrest that provides essential lumbar support while maintaining a more compact, streamlined design. This makes it an ideal choice for high-traffic zones where ease of visibility and movement is a priority for both players and floor staff.
