POWDER COATING

Our powder coating service is available for ALL stainless steel and aluminum products.

- For our Chinese manufactured disc bases, we only powder coat the 'Prague' stainless steel range to avoid imperfections.
- For our Italian and Dolce Vita pre-powder coated aluminum products we **DO** offer re-powder coating.
- Always check with our team for clarification on which products we offer powder coating for.

FINISHES:

There are 3 standard finishes of powder coat that we offer; Matt, Satin or Gloss.

Matt - *Usually has a dull finish rather than a shiny one when it dries.*
Satin - *Is silky and reflects more light then a matt finish but less than a gloss finish.*
Gloss - *Has a reflective or shiny finish.*

LEADTIME:

The lead time for powder coating is approximatly 7-14 days dependent on the order quantity. For larger orders, speak to the team to get a more accurate lead time.

PRICING:

The standard powder coating charge is for **Dulux Duralloy** and **Alphatec** as well as some **Interpon** colours listed in this document. All other non standard powders will attract a surcharge and are subject to availability at time of order. Surcharges do vary subject to the powder, availability and quantity.

STOCKED:

The colours in this document are powders that are permanently stocked by our powder coater. If your colour is not listed in this document, you will need to check the availability with us before ordering. If we do not have the colour you require, it may be possible to purchase the powder, however additional fees and extended leadtimes will apply.

These images have been supplied from the Dulux and Interpon electronic catalogues. We are not responsible if a colour appears different to what is ordered.
