Trump

The Trump Gaming Range is defined by its commanding, club-style design, created specifically for high-stakes VIP lounges and premium gaming environments. Unlike standard stools, the Trump offers a fully enclosed, deep-bucket seat that provides a sense of privacy and comfort for the user. Its pedestal base is crafted from heavy-gauge stainless steel to prevent tipping and ensure rock-solid stability during long-duration play. Available in a high-sheen Mirror Gold or a sophisticated Matt Black, this range uses a high-performance swivel-return mechanism and reinforced footring to deliver a smooth, 360-degree experience that matches the high-end atmosphere of a world-class casino.
